1. Japanese Patent Application No. 2000-235657 discloses an image display method for producing an image of a virtual object illuminated by a virtual light source using a computer graphics to display the produced image. The method includes detecting an illumination light beam, which is emitted from an illumination light source arranged in a space in which an image display apparatus is provided and is incident on the image display apparatus, calculating an incident direction, intensity and a color of the detected illumination light beam, defining a second virtual light source in a virtual space in which the virtual object and a first virtual light source are defined, producing an image of the virtual object illuminated by the first and second light sources, and displaying the produced image.

2. Japanese Patent Application No. 06-70267 discloses a head mount display having several optical detectors for deciding light direction. (Fig. 1 and column [0008]). The relevance of this document is also discussed at page 3 of the specification of the present application.

The following are also listed on the accompanying PTO-1449 and are in a non-English language:

3. Japanese Patent Application No. 7-46577

4. Japanese Patent Application No. 2001-60082

The relevance of documents 3 and 4 above is discussed at page 2 of the specification of the present application.
